NewsCutter Nitris DX

High performance SD and HD broadcast news editing system

When the stakes are high and you need the best quality with fast turnaround for news, news magazine, and sports programming, the Avid® NewsCutter® Nitris® DX is the intuitive, reliable, and deeply capable editor that delivers. Combining time-saving news features, newsroom integration, and the acclaimed NewsCutter video toolset with Avid Nitris DX hardware, NewsCutter Nitris DX is a remarkably responsive multi-codec, SD/HD turnkey editing solution. The most powerful NewsCutter ever provides unmatched speed, news editing agility, and creative and technical depth and flexibility in single workgroup-connected, dependable system.

Avid NewsCutter Nitris DX

Speed High-performance news-focused editing without compromising creativity.

Newsroom integration Tight linkage with newsroom computer systems for a more efficient workflow and improved newscast accuracy.

Open integration Interface and interconnect with third party systems and components, including common and emerging acquisition formats.

Collaborative power Support for the Avid HD News production environment means the smoothest end-to-end workflow in the business - and total workgroup connectivity with access to media anywhere, from anywhere.

Format flexibility Avid Media Access support for XDCAM EX/HD, P2/AVC-I, and GFCAM, gives you the ultimate in fast and easy acquisition to editing workflow.

Nitris DX hardware: performance and connectivity NewsCutter Nitris DX provides you with full facility class connectivity, DNxHD acceleration, and high-performance real-time output for speed and workflow flexibility.

NEWS EDITING DONE RIGHT

NewsCutter Nitris DX is designed to meet tight deadlines with an array of special news, editing and voiceover tools, native media and metadata support for XDCAM EX/HD, AVC-I, and GFCAM cards and discs, and integrated media management that helps you stay relaxed and focused on telling the best story. Avid's Open Timeline and mix and match real-time transcoding let you simply use material regardless of the format - and concentrate on the editing. When it's crunch time, FrameChase™ editing lets you start editing just seconds after an ingest begins, and then send completed stories to air with a simple Send to Playback command, or use the included Sorensen Squeeze software to get your story to the Web.

TIME SAVING INTEGRATION

Save valuable time with Avid Media Access (AMA) technology that lets you skip the import step and just start editing from the camera disc or card, with all metadata available. Or, use the VTR shuttle knob to easily control capture into NewsCutter from tape. Keep in sync with the story and the newsroom with an interactive iNEWS® or ENPS session right inside NewsCutter. When you're ready to send to air, a simple drop down option sends the package directly to the Avid AirSpeed® Multi Stream HD/SD server, or to other play out servers to get the story on air in the shortest possible time.

ENGINEERED FOR COLLABORATION

Share media, projects, and ideas within your facility or around the world. Avid NewsCutter Nitris DX is a key part of the high-productivity Avid HD News environment with support for end-to-end native format workflows, and transparent collaboration and media sharing. That includes tight integration with the Avid Interplay® video production asset management system for accelerated real-time workflow, and wide-area media access, transcoding and transport tools that let you easily and swiftly find, select and move media, wherever it is and wherever you are.
